Handcrafted Art Tile

Square Footage Calculator

- Divide the space to be tiled into different areas.
- Measure the height and width of each area
- Multiply the height and width of each area to find the total area in inches.
- Divide the number of each area by 144 to find the square feet for the area.
- Add all of the areas together for total square footage.
- Be sure to add 10% for overage

Area A: Width _____ in. x Height _____ in = _____ /144 = _____ sqft.

Area B: Width _____ in. x Height _____ in = _____ /144 = _____ sqft.

Area C: Width _____ in. x Height _____ in = _____ /144 = _____ sqft.

Area D: Width _____ in. x Height _____ in = _____ /144 = _____ sqft.

Tile Per Sqft

- 2 Inch -36 per sqft
- 3 Inch - 16 per sqft
- 4 Inch - 9 per sqft
- 6 Inch - 4 per sqft
- 2x6 in - 12 per sqft
- 3x6 in - 8 per sqft

Total Area = _____ sqft.

Overage 10% = _____ sqft.

Total Tile Needed = _____ sqft.
